 - **Question on Structure; social-ecological model ? Intervention strategy?**
 - No more CFS standards but need guidance on Safe space (in MHPSS standard)?
 - Family strengthening(not only parents...) , where to include Alternative care ?
 - Community based approaches (instead of mechanisms)
 - Launch: Fall 2019

A

- **Family strengthening TF**

- Generate evidence on the link between programming with caregivers and outcomes for children's psychosocial well-being (ongoing research project in Liberia_IRC and Lebanon _WCH)
- CPMS Standard Development
- E-learning module on child's development and wellbeing (SC)- support of the Syrian Wellbeing Collective <https://mailchi.mp/disasterready/new-ngo-access-to-private-funding-and-impacts-from-the-grand-bargain-504301>
- ACF Desk review to *determine the mental health, psychosocial and care practices factors related to chronic malnutrition of children under 5 years old* ; established a strong relation between chronic malnutrition and mental health/psychosocial risks (maternal depression in particular) associated to compromised parenting behaviour and non-responsive caregiving practices. The study also highlighted direct and indirect interventions focused on best practices, in order to address MHPSS causes and consequences.

- **Case Management TF**

- Quality assessment Framework
- Supervision training package (english, French, Arabic) <https://resourcecentre.savethechildren.net/library/case-management-supervision-and-coaching-package>
- IM4CM (SOP , DSC, DPP, standardised forms)
